Successful Application of the Physics Laws

A team of students from S. 4E (Chau Ka Po, Ho Ting Fung, Li Yuen Ying, Wong Yick Yu) won the merit prize in the Hong Kong Macau Inter-School Straw Competition 2008 “Roll In The City” organized by the City University of Hong Kong. They applied the theory learnt in a simulation exercise and gained valuable experience from other teams' creative model design exercise in the event.

Congratulations to them all!
