HK Technology & Energy Events 2008

Two teams of Carmel students (Photos 1(a) and 1(b)) have participated in the “HK Technology & Energy Events 2008” jointly organized by the Hong Kong Science & Technology Parks and CLP. Under the encouragement and guidance of Mr. Chau Kwai Sum and Mr. Li Yun Kau, the students showed great interest in the project. In the past few months, they carried out lots of researches and experienced numerous trials and errors in designing the blades for the wind power generators. They finished the projects just one day before the competition. Photos 2 (a) and (b) show the scene of the first and final round of the competition.
